

The Sparkans FIRST Robotics Team

STEM Innovation Academy

SPARKANS

Information Package

2022

Who Are We?

We are the Sparkans FIRST Robotics team, a group of passionate and dedicated high school students from STEM Innovation Academy, Calgary, Alberta. Our school is very dedicated to science, technology, engineering, and math. This is the first year our high school has opened, meaning we are starting completely from scratch. Meaning we have a lot more work to do in the next six weeks than other, developed teams. However, the newly founded Sparkans have shown dedication to this team, and we are very excited to compete for the first time. We are building the foundation for future generations of Sparkans!

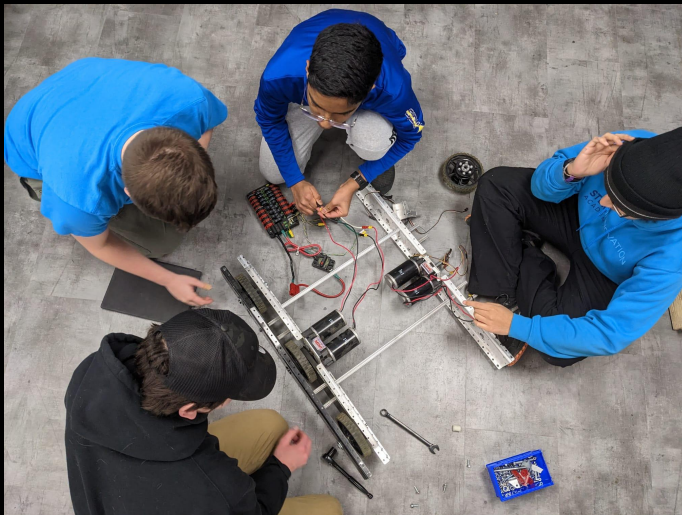

FIRST (For Inspiration and Recognition of Science and Technology) is a global organization that promotes youth engagement in STEM fields through robotics competitions. The competition challenges teams of students to design, build, and program a robot to compete in challenges that combine elements of sports, engineering, and technology. The FIRST competition is a largely known group including more than 80,000 students and 25,000 mentors from 26 countries. Meaning that at competitions there will be a very large and diverse group of people. Ranging from young teenagers, to CEO's.

All team members have the opportunity to widely develop their skills. The teams we are separated into doesn't stop us from learning the whole process of how to construct a large robot. Everyone is connected to each other. The marketing needs to know the construction of the robot, and vice versa. This connection between us really gives a very unique chance to experience the competition first hand, in every aspect. We believe that the FIRST Robotics Competition provides a unique and valuable learning experience for our team members, and we are excited about the potential it has to inspire and engage young people in STEM fields. With your support, we can make this experience a reality.

Event Information

FIRST Robotics Competition is an international robotics competition dedicated for high school students to self-design and construct semi-autonomous, competitive robots to compete with other schools from around the world. Every year, teams of high school students, coaches, and mentors work during a six-week period to build robots capable of competing in that year's game. Manufacturing, working with different materials, prototyping, electronics, soldering, coding, and so much more go into making a FRC Robot. The competition kickoff will be taking place on January 7th, and following a six week building period, the first competition will take place on February 28 - March 3. Founded in the heart of the University of Calgary, Sparkans

need funds to help them travel to competition locations, including Victoria and for the finals, Houston.

As a STEM-based school, Sparkans have taken a unique and innovative approach to get the best out of their first year. The robotics team is divided into different, interconnected sectors to help get everything done before the deadline. Those include: Build Team (consisting of Electrical, Mechanical, M&E Interface, and EIC

Interface) Communications and Marketing, Programming Team, Project Management, Drive Team, and Design Leads.

(could have a picture of the hexagonal image with the names and group)

Although it is the first year for Sparkans to participate in FIRST and even further, the year of its founding, the team is quick to receive support from quick believers. They are lucky to receive support from FRC, who have provided them with a kit with some of the equipment and materials they will be needing to start off with the building of their robot. Alberta Tech Alliance has also been generous enough to donate a previous FRC robot, which has allowed the Sparkans' Build Team to explore the creation of a competitive, semi-autonomous robot through disassembling and reassembling it.

LEVELS OF SPONSORSHIP

BRONZE - \$250

Name or company logo displayed on patron bar of Sparkans website.

SILVER - \$500

Includes benefits from Bronze Level.

Medium-sized display of name or company name on robot.

Mention on all social media (Instagram, Twitter, etc).

GOLD - \$1000

Includes benefits from Bronze and Silver Levels.

Large-sized branding on team apparel (Sparkans shirt).

DIAMOND - \$5000

Includes benefits from Bronze, Silver, Gold, and Platinum Levels.

Official Sponsor Partnership.

Invitation to competition.

Name or company logo displayed on a large plaque in our School's Fabrication Lab.

PLATINUM - \$2500

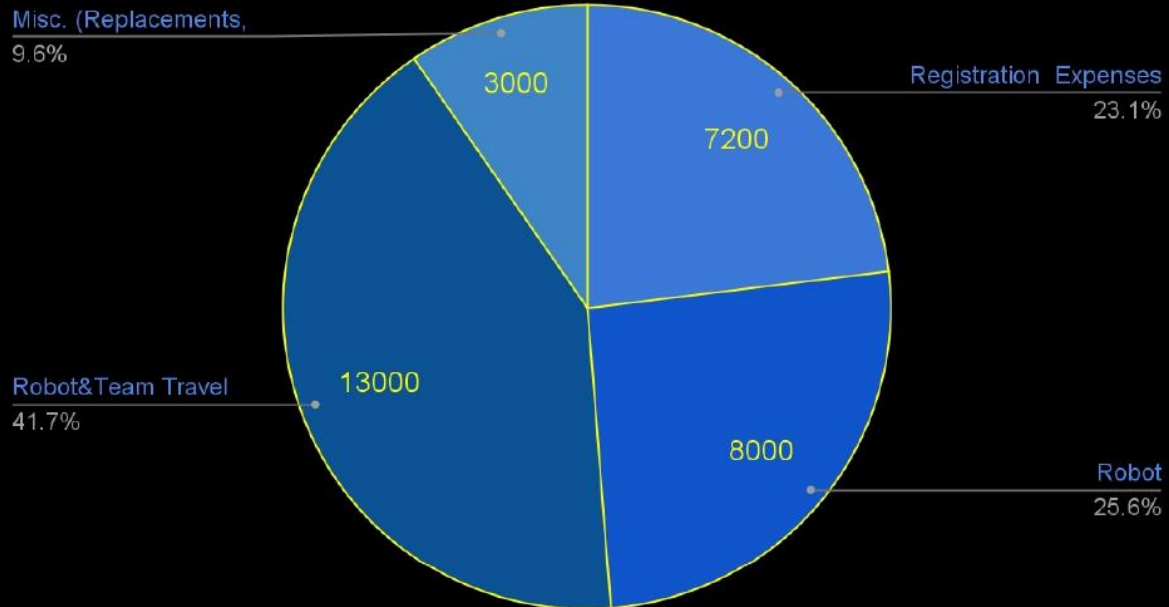

Includes benefits from Bronze, Silver, and Gold Levels.

Name or company logo displayed on a medium-sized plaque in our School's Fabrication Lab.

Access to team and robot meet and greet.

Budget

2023 Sparkans Budget

PERSONNEL EXPENSES	ESTIMATED	ACTUAL	DIFFERENCE
Merch	500.00	0.00	500.00
Travel	12,000.00	0.00	12,000.00
Total Personnel Expenses	12,500.00	0.00	12,500.00
OPERATING EXPENSES	ESTIMATED	ACTUAL	DIFFERENCE
Entry Fee	6,500.00	6,500.00	0.00
Tools (Repair and Supply)	1,500.00	0.00	1,500.00
Robot Transport	500.00	0.00	500.00
Robot Components/Parts (E+M)	8,000.00	0.00	8,000.00
Coding (Software, Domains etc.)	50.00	0.00	30.00
Registration, Robot, and Event Expen	700.00	0.00	700.00
Misc. (Replacements, Other Items)	1,500.00	0.00	1,500.00
Total Operating Expenses	18,750.00	6,500.00	12,230.00
